

Trailer Management

# Flexible Solar Intelligence

## FL Flex™ 2+ Solar Powered GPS Tracking Device with All-In-One Integrated Cargo Sensor Option

FL Flex 2+ is the latest addition to the trusted FL Flex family. Get the powerful and customizable benefits of the FL Flex 2 with a built-in solar power panel to extend the life of your device.

Optimize trailer and cargo management with this all-in-one trailer tracking unit featuring an embedded solar panel and integrated cargo sensor (optional). The embedded solar panel extends battery usage to keep your trailers on the road longer. The integrated IntelliScan™ cargo sensor utilizes the industry's only combination of time-of-flight laser and optical recognition. It's designed for fast installation supporting both sheet & post, and composite-nose trailer construction.

Additional door sensor, automated tire inflation system (ATIS), and tire pressure monitoring system (TPMS) are available as add-ons to help optimize fleet operations with ultimate device flexibility.

## Benefits

### REDUCE COSTLY FIELD MAINTENANCE

Plan and schedule maintenance based on tracker mileage. Save money and maintain safety by adding on TPMS & ATIS.

### IMPROVE TRAILER UTILIZATION

Optimize trailer inventories at key locations and increase the number of turns per trailer. Keep your trailers moving to increase profitability.

### RIGHT-SIZE YOUR FLEET

Do more with the trailers you have. Determine the right balance between owned and leased trailers, and buying new ones only when you need them.

### MINIMIZE TRAILER AND CARGO DAMAGE

Detect improper loading and use evidence to resolve claims with image retrieval technology and time stamped images.
