Omnitracs Virtual Load View

Automatically and securely share tracking information with third parties to streamline load-management and improve customer service.

Solution Highlights

User-defined, automated load tracking

Seamless data integration with your back-office solutions

Intelligent load-tracking tracks only when the load is on the vehicle

Tracking via Omnitracs in-cab solutions

Customizable automated updates

Eliminate Manual Freight-Tracking

Share your Omnitracs load-management data through Virtual Load View so you can:

- Create and track loads
- Confirm pick-up and delivery
- Proactively respond to issues

Omnitracs

The Extra Mile

Reduce the overhead required to track loads

Improve communication between brokers, shippers, and carriers

Reduce customer service workload and increase efficiency

Integrate quickly with no additional hardware requirements
