ABOUT SOLERA FLEET SOLUTIONS

We're transforming the transportation industry, building a future where fleet management is both simplified and powerful. As we unify our current industry-leading fleet solutions across Omnitracs, SmartDrive, Spireon, SuperVision, Sylectus, and eDriving, we are streamlining the user experience while bolstering efficiency for our customers.

At Solera, we're tech-forward and customer-obsessed, letting customers' innovation needs drive our business solutions. Backed by the broadest and deepest fleet intelligence platform, we are:

- Combining proven solutions with the latest in innovative design and technology
- Serving the largest for-hire and private fleets in the transportation industry
- Leveraging heritage and industry expertise to maximize unmatched data-driven solutions

We invite you to browse our suite of solutions and contact us at

VIDEO-BASED SAFETY

We know that an effective safety program does not rely on dashcams alone. A video-based safety program backed by a managed service will set the stage for your proactive approach to driver training, performance improvement, and overall risk mitigation.

AI-enabled real-time alerts for distraction, speeding, close following, and more, help your driver during that high-risk moment; while comprehensive dashboards and easy coaching workflows help you continuously improve your fleet's safety.

which solution
is best for your
fleet's needs.

CONTINUOUS LICENSE MONITORING & DRIVER METRICS

Keeping your business and drivers protected year-round is our goal. We combine an industry leading continuous driver license monitoring solution with digital document storage and CSA compliance alerts.

See data from multiple sources in one view for actionable driver insights and a complete compliance profile. Identify leading indicators of risk—and correct them—before violations or collisions occur. Compile complete driver risk profiles with safety scores to attract and retain the best talent.

◀ SuperVision

Talk to us about which safety solution is best for your fleet's needs.

more likely for a
suspended driver to
be involved in a crash.

TRAILER & ASSET MANAGEMENT

Know where all vehicles and assets—containers, chassis, flatbeds, tankers, machinery—are at all times. Know if your trailers are empty and ready for loading via AI-enabled sensors. Empower your drivers via mobile apps to know where the closest empty trailer is.

With today's labor and trailer shortage, having this real-time, actionable data available in one place enables more efficient operations, improved vehicle health, and improved driver satisfaction—all of which can help you stay ahead of your competition.

accuracy.

ROUTING & DISPATCH

Your customers and teams need insight—and you need solutions flexible enough to scale. Plan, execute, and iterate on routes to balance customer support with the most efficient and lucrative routes for your business.

Employ planning, routing, and dispatch solutions that keep vehicle capacity, business rules, customer requirements, and more in mind. Automatically respond to exceptions to meet customer demands in real-time with AI-enabled route optimization. Chosen by the world's largest fleets, our routing solutions will reduce mileage and costs, improve customer service, and provide real-time route guidance.

DRIVER WORKFLOW

Driver satisfaction and retention is important—it's crucial to make their jobs as efficient as possible by providing technology that is easy-to-use and simplifies the work.

Eliminate paper and update drivers with the route, load, and process information they need to complete tasks in and out of the cab without making a single phone call. Empower your drivers with easy-to-build driver workflows, configurable electronic forms, enhanced two-way communication, and proof-of-delivery capture. Integrate HOS compliance tasks with workflows in one place, keeping your driver focused on the road and the job at hand.

drivers' experience.

COMPLIANCE & ELD

Non-compliance can put the brakes on your entire fleet. Whether you're operating in the US or Canada, we'll ensure you adhere to federal, state, and local regulations and minimize violations.

For over 30 years, Solera | Omnitrac's has been committed to compliance, prioritizing accuracy and reliability so tens of thousands of vehicles can remain focused, productive, and safe on the road. We have you covered across HOS, IFTA, DVIR, and Weigh Station Bypass needs.

TRANSPORTATION MANAGEMENT SYSTEM

As your fleet grows, how will your trucking operation rise to the occasion? Our transportation management system (TMS) can simplify and automate communication, manage compliance, and monitor and control expenses all from one, cloud-based application so you can focus on completing every job on schedule.

Manage billing and invoicing, along with deductions and advances, and driver settlements. Fuel cards can also be integrated and managed with no hassle from one single application.

◀ Sylectus
